“First Aid”

FIRST AID

7 BASIC FIRST AID STEPS

1.- CONTROL YOU

Keep calm and be able to act quickly helping the person in need.

2.- PERSONAL SECURITY

Evaluate the scene where the accident happened, to avoid further damage

3.-EVALUATE THE INJURED

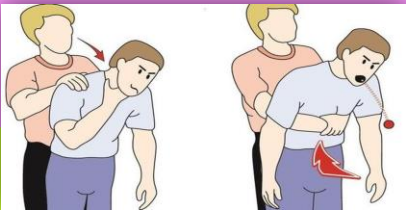

Check the general state of the patient, state of consciousness, respiratory and circulatory condition

4.- VITAL SIGNS

It is important since They are signs that indicate the presence of life

5.-IN CASE OF SUFFOCATION

It is important to know the procedure to help people who eat food or any other object

6.- RESCUE BREATH

In the absence of reaphalation, this step will help the patient

7.- CARDIO PULMONARY RESUSCITATION

CPR must be applied, it consists of a combination of breaths and chest compressions
