Cartel del tema:

“first aid”

the most common emergencies are suffocation, fractures, burns, trauma and bleeding

¿what to do in emergencies?

1° control: don't panic

2° Personal security: it is important that you evaluate the scene where the accident occurred

3° Evaluate the injured: verify the general state of the patient, state of consciousness, respiratory and circulatory condition.

Vital signs: are the signs that indicate the presence of life.

In case of suffocation:

blood pressure

respiratory rate

the pulse

temperature
