Pediatric spoon

X- ray machine

Bone plate

Dermabrader

Exercise machine

ECG

Dyalisis machine

Scale

And now it's your turn, write about 5 instruments

1.- A pulse oximeter or pulse oximeter is a medical device that indirectly measures the oxygen saturation of the red blood of a patient who has a cardiovascular problem, not directly through a blood sample.

2.- The thermometer is a temperature measuring instrument. Since its invention it has evolved a lot, mainly from the development of digital thermometers

3.- baumanometer, an instrument that allows measuring the force exerted by the blood on the walls of the arteries, its use is of great importance for medical diagnosis, since it allows detecting any abnormality related to blood pressure and the heart.

4.- The test tube is part of the glassware in a chemistry lab.

5.- Nursing scissors and forceps are one of the simplest and most useful instruments for a nurse. We are sure that you will use them every day. For cutting bandages, dressings or for the most difficult to open blisters.
