“Consultant”

CONSULTANT

The consulting nurse is a professional with very broad knowledge, skills and abilities, and is also in charge of making decisions.

- **What do they do?**

his job is to make clinical, preventive, diagnostic and therapeutic decisions related to chronic wounds. They are also in charge of interpreting the diagnoses, so that they can see where and why the injury originated.

- **Where do they work?**

They work at a hospital

- **Is his or her job easy?**

their work is very demanding since if a patient arrives with a chronic wound as mentioned above they must be checking at all times.

- **Which is the most beautiful thing in his or her job?**

take care of the person so that soon he can improve.

- the consulting nurse does important work
- the consulting nurse is in charge of interpreting the diagnoses
- the consulting nurse is in charge of treating the chronic wounds of the patients
