

Signos y síntomas

You know it s a symptom and its examples?

A symptom is a sign that the person experiencing it feels or notices, although other people may not easily notice it. For example, weakness, muscle pain, and shortness of breath may be symptoms of pneumonia

You know
what a sign
is and its
examples?

A sign is a sign that can be
seen by another
person, such as a loved
one, doctor, nurse, or other
health care professional.
For example, fever, rapid
breathing, and abnormal
lung sounds heard through
a stethoscope may be signs
of pneumonia.
