Medical instruments

A hospital has different areas, each of which helps in the treatment of diseases in different parts of the body, such as Gynecology, Obstetrics, Pediatrics, just to mention a few of them.

Each area uses different special instruments to perform its tasks, here you can see some of these tools and their uses that you can find in a hospital.

_____ **ECG** _____

is an instrument used to monitor the heart.

___ **Microscope** is for examining tissues, samples, etc, very closely.

___ **Centrifuge** ___ is for separating substances by spinning them.

___ **Scale** ___ is used to weigh substances in a laboratory.

___ **exercise machine** ___ is usually used for medical treatments to get strenght again after a injury.

Let´s talk about ___ **Bone plate** ___ which are used to fix bones when they are broken.

In Dermatology área, doctors use a ___ **Dermabrader** ___ to remove damaged skin.

When a person has kidney problems a ___ **Dyalisis machine** ___ helps to clean blood.

If you have problems with your nerves ___ **Neurological pinwheel** ___ tests for sensations in them.

In Pediatrics area ___ **pediatric spoon** ___ is used to specially for children to grip.

___ **Scalpel** ___ is mostly used by surgeons to perform operatios, it can cut your skin and is very dangerous if you play it.

When a radiologist needs to watch into your body, specially your bones he uses a **X-ray machine** to examine them.

Neurological pinwheel

Scalpel

Microscope

Centrifuge

Pediatric spoon

X- ray machine

Bone plate

Dermabrader

Exercise machine

ECG

Dyalisis machine

Scale

And now it's your turn, write about 5 instruments

1.- The **Stethoscope** is generally used in auscultation of heart sounds or breath sounds.

2.- **syringe** is used to introduce small amounts of medications or to sample components in inaccessible areas

3.- The **thermometer** is used to measure body temperature.

4.- An **autoclave** is a thick-walled metal container with a hermetic seal that allows working with high-pressure, high-temperature steam that serves to sterilize instruments.

5.- **surgical staplers** to put staples to suture wounds
