“describing the hospitalm team midwife”

Border Comalapa, Chiapas a 27 de junio 2020

My work as a midwife is very old having a close relationship with the indigenous world.

My profession as a midwife is part of civilization and its function is also part of ritual and social.

I specialize in providing care during pregnancy, labor and delivery.

I help future mothers to obtain the necessary care for the baby and during delivery.

In order to be a midwife I had to take certification courses at imms.

My work is not easy because some deliveries are complicated at the time.

My work is in rural areas or together with other professionals.

My work is a very beautiful work because I see the opportunity of life to another being.

## CONCLUSIÓN

We understand that being a midwife is a great task in places where a hospital or a doctor is not close and is of great help to prepare the mother at the time of delivery.
