“My nursing student profile”

My nursing student profile

Hello, my name is Litzi Roblero Morales. I study nursing at the Southeast University "UDS" in the Comalapa border. I attend classes on Saturdays. With a schedule from seven-thirty A.m. to two-thirty p.m., this profession provides understanding, kindness, affection and solidarity towards the patient, I will be dedicating myself to take care of the sick, injured, injured and provide support in their recovery, I will be working in clinics, hospitals, etc. To be a good nurse I must know the techniques of the health profession. Do you think that studying a nursing career was easy?

As we already know that this profession is not easy as you see it with the naked eye in the health area, as I have only been studying for a year at university I am considering it very difficult and stressful but I put the greatest importance on this career because it is what I like it.
