### “My life as a nursing student”

I am studying nursing because I enjoy to know about the people's health and the human body.

Although I am not working as nurse now, I love to help people with poor health.

I do not consider myself to be an excellent student, but I am giving my best and I am not having difficulties during my career.

I do not like to waste my time, I do not do things that affect my learning process and I do not think about stuff that are not related to Nursing.

Family or social problems do not make me feel unmotivated because the passion I feel for the career is even greater.

Sometimes I feel that I am not being so serious and responsible with my profile; however, I am trying to learn as much as I can about nursing, I am improving my knowledge about this area and I am practicing my learned skills because I want to be a competent nursing in the future and I know that I am doing a good job.

So now the questions are; Am I studying the right thing?...what else do I need to learn?...
