Medical instruments

A hospital has different areas, each of which helps in the treatment of diseases in different parts of the body, such as Gynecology, Obstetrics, Pediatrics, just to mention a few of them.

Each area uses different special instruments to perform its tasks, here you can see some of these tools and their uses that you can find in a hospital.

ECG is an instrument used to monitor the heart.

Microscope is for examining tissues, samples, etc, very closely.

Centrifuge is for separating substances by spinning them.

Scale is used to weigh substances in a laboratory.

Exercise machine is usually used for medical treatments to get strength again after an injury.

Let's talk about **Bone plate** which are used to fix bones when they are broken.

In Dermatology area, doctors use a **Scalpel** to remove damaged skin.

When a person has kidney problems a **Dialysis machine** helps to clean blood.

If you have problems with your nerves **Neurological pinwheel** tests for sensations in them.

In Pediatrics area **Pediatric spoon** is used to specially for children to grip.

Scalpel is mostly used by surgeons to perform operations, it can cut your skin and is very dangerous if you play it.

When a radiologist needs to watch into your body, specially your bones he uses a **X-ray machine** to examine them.

Neurological pinwheel

Scalpel

Microscope

Centrifuge

Pediatric spoon

X-ray machine

Bone plate

Dermabrader

Exercise machine

ECG

Dialysis machine

Scale

And now it's your turn, write about 5 instruments

1. Scalpel : this is a tool to cut off parts of the skin
2. Microscope: is an instrument that allows us to observe objects that are not perceptible to the human eye, such as viruses or molecules that we cannot see with the naked eye
3. X- ray machine: are especially useful in detecting diseases of the skeleton also for soft tissue diseases such as pneumonia and lung cancer
4. Centrifuge: is used for the separation process of sedimentation of the components of a liquid and a solid
5. screws and plates: is used for when people break part of their bones and have to repair them and watch them evolve
