Medical instruments

A hospital has different areas, each of which helps in the treatment of diseases in different parts of the body, such as Gynecology, Obstetrics, Pediatrics, just to mention a few of them.

Each area uses different special instruments to perform its tasks, here you can see some of these tools and their uses that you can find in a hospital.

ECG is an instrument used to monitor the heart.

MICROSCOPE is for examining tissues, samples, etc, very closely.

CENTRIFUGUE is for separating substances by spinning them.

SCALE is used to weigh substances in a laboratory.

EXERCISE MACHINE is usually used for medical treatments to get strenght again after a injury.

Let's talk about **BONE PLATE** which are used to fix bones when they are broken.

In Dermatology área, doctors use a **DERMABRADER** to remove damaged skin.

When a person has kidney problems a **DYALISIS MACHINE** helps to clean blood.

If you have problems with your nerves **NEUROLOGICAL PINWHEEL** tests for sensations in them.

In Pediatrics area **PEDIATRIC SPOON** is used to specially for children to grip.

SCALPEL is mostly used by surgeons to perform operatios, it can cut your skin and is very dangerous if you play it.

When a radiologist needs to watch into your body, specially your bones he uses a **X-RAY MACHINE** to examine them.

Neurological pinwheel---

Scalpel -----

Microscope ---

Centrifugue ----

Pediatric spoon---

X- ray machine ----

Bone plate---

Dermabrader -----

Exercise machine

ECG--

Dyalisis machine ----

Scale ----

And now it's your turn, write about 5 instruments

1

Gauze is used to cover wounds after being washed and disinfected

2.-

for holding delicate tissues during surgeries it is used **plain adson forcep**

3.-

we use the **thermometer** to measure the temperature

4.-

sun **syringes** used to introduce liquids into the body

5.-

A **defibrillator** is an electronic device that restores the normal heart rhythm by a high-voltage electric shock to stop arrhythmias
