FRONTERA COMALAPA, CHIAPAS TO 5 OF JULY OF THE 2020.

Hello, my name is Yosmar Emanuel Figueroa Rodríguez. I have 18 years old. I am from piedra labrada Chiapas México city. I am study Lic In nursing. I am a person very smart and I make the best decision responsible and I like to help to the people that I love. My life is simple and funny. And as a nursing professional I want to provide the best care to people. Because there are people who criticize nurses for not knowing how to do their job. They also criticize them for the character they have with patients. There are nurses who do not know to treat patients. But we are not all the same. That's why I'm studying nursing so I can show people that not all nurses are the same
