## MY NURSING STUDENT PROFILE

-hello how is my name, Abner Uribe Hernández Méndez

-as every person has a trade, or some occupation or pleasure that he practices day by day

-I am characterized by my way of being friendly, smiling, with others, worker, and get ahead with what i propose.

-I like the nursing career because this way I can contribute with the people helping them in what i can and more than anything giving a Good service

-I really like nursing more where we speak about the human body its anatomy

- I do not like it when a nurse treats a patient badiy, nor when he does not do his jod as it is, Worse when they do not want to contribute to the cause of an enderm, I do not like it when you do not put the garbage correctly in its place.
