

Hello teacher, my name is Maria José hidalgo Robledo, I am 18 years old and my birthday is on May 1, I was born in 2002, I like to go out with friends and spend time with them together, I like to hang out with my daughter and playing with her. I just finished my high school at comalapa high school in the morning shift where I met my friends and spent many beautiful moments with them. I hope that now that I am in college I can meet new friends learn more about them and that they learn something from me, to be able to get along with my teachers and do well in my grades.

I hope I can finish my career with a good average and be able to move forward since I have a girl for her, I am studying to be able to give a better future.

My performance in English:

I am very bad at English, I do not understand it easily but I promise to put forward this subject to learn why I know that in the future it will help me for some work, I know that it is important to learn a language but it is difficult for me, I hope for myself have understanding since my performance is in other subjects. Perhaps because I have not caught the taste but little by little I will understand it better, what fails me is the pronunciation of some words and the translation of them.

Pleasures:

One of the subjects that most attracts my attention is anatomy, the functioning of our body has always caught my attention, I like to help people and I think that for this reason being a nurse calls my attention and being able to help those who need me, I wanted to study medicine but because of life issues I could no longer but I hope to be able to perform my skills in a nursing career and perhaps in the future to be able to study medicine.

Purposes:

My purposes are to be able to finish my career and start practicing it by finding a job and getting ahead with my daughter Farewell:

I hope my work is fine as I mentioned before, I am not good with English and I do the best I can, I promise to improve. Have a nice afternoon, goodbye
