PRESENTACIÓN

Hi teacher. My name is Mayra Leticia Martinez Roblero. I am currently living in the Municipality of La Grandeza Chiapas. I am 18 years old. I was born on July 29, 2002. I am the youngest of a brother and a sister, he is 27 years old and she is 23. I studied primary, secondary and level where I currently live.

I studied at the College the Bachilleres Chiapas, Plantel 37, I had a friend, she is a very good person and four friends, they are very good, we six were in the Hygiene and Public Health training, we are still united. The teacher who gave us the training is a Pharmacobiologist Chemist, he is an excellent teacher, so he motivated us to continue studying and I decided to choose a career that was related to health.

Although being in high school I already had the desire to study nursing. While in the sixth semester of COBACH, some people came to promote different universities. Among those universities, the University of the Southeast Campus from the border, was the one that met all my expectations, I am very interested in the Bachelor of Nursing, because it is where you can provide and give the necessary care for the recovery of a patient.

I would like to share with you teacher, Ivonne, some information about my personal life. For example, black is the color I like the most of all the colors that exist and also one of my favorites is white. I like to face challenges, for example this subject, since the language of English is spoken in it, it is a foreign language and Spanish is the language I speak, so I consider it a great challenge.

In the course of this course I hope to understand English a little more, and to be able to count on your professional help. One of my favorite hobbies is listening to music, because I see it as a means of relaxation, I love dogs very much, they are very good company for me. I am a reserved person, although I also like to interact with other people. Bread is what I like to eat the most.

It cannot go unnoticed that I like to dance at family gatherings. I have a family made up of my father, my mother, a brother, a sister and his servant, they are the ones who have supported me in all my decisions and have also been there when I need them, and they are the strongest pillar of my life. I am currently single, I live with my parents, they are the ones who are supporting me financially to pay for my studies.
