## **IMPORTANCE OF ENGLISH IN THE NURSING AREA.**

For Nursing Degree students learn English is very important. They place great value on the use of English in all areas of professional practice nurse, now, they find it more useful in the scientific-research side. They value competition in the use of the especially valuable English language for work abroad.

English today is a fundamental tool; in the academic process of each student the different areas. but in the field of health it plays an important role today. English, in turn, English constitutes the most important language of international communication in all areas of the human activity (science, art, commerce, politics, among others). It is essential that knowledge medical disclosure and universalize so you can benefit the most possible of patients around of the world.

To be able to climb a job abroad it is important to exercise the English language in order to aspire to a good job and have good communication with the patients that we as nurses are our priority.
