ACTIVIDAD 2
"DISTRIBUCION NORMAL"

DOCENTE
Mtro. Aldo Irecta Nájera

ELABORO
Susana Mondragón Gómez

Elabora: Susana Mondragón Gómez

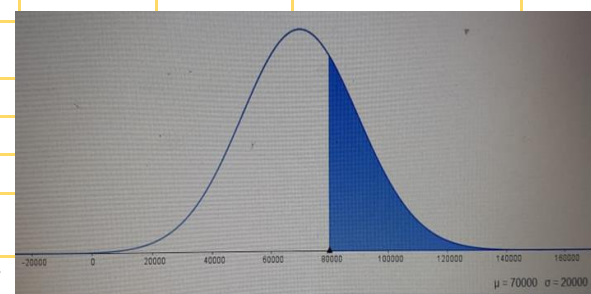

Desarrollo de la actividad:

	Los montos de dinero que se piden en las solicitudes de préstamos en Down River Federal Savings tiene una distribución normal, una media de \$70,000 y una desviación estándar de \$20,000. ¿Cual es la probabilidad de que:				
	a) El monto solicitado sea de \$80,000 o superior?				
	b) El monto solicitado oscile entre \$65,000 y \$80,000?				
	c) El monto solicitado sea de \$65,000 o Inferior				
	a) El monto solicitado sea de \$80,000 o superior?				
	Estandarización para resolver el ejercicio:			0.5	

	X	80000	Z=	En la tabla de la distribución normal, el área total debajo de la curva es igual a 1 y se acumula el área de probabilidad, de izquierda a derecha y esta área es del valor de Z=0.5 hacia la derecha, por lo tanto deberemos obtenerla por complemento; al área acumulada hasta el valor de P(Z<0.5) que se obtiene de manera directa en tabla; habra que realizar la siguiente resta P(Z>=0.5)=1-P(Z<0.5)
	Media	70000	P(Z>=0.5)	
	Desviación estándar	20000		

paso 1 tipificacion

P(80000 <= x)	
P((80000-70000)/20000 <= x)	
P(10000/20000 <= x)	
p(0.5 <= x)	

z	.00	.01	.02	.03	.04	.05	.06	.07	.08	.09

Paso 2 Graficar

Solución:

P(Z>=0.5) = 1 - P(Z<0.5) = 0.6915

Valor de tablas P(Z<0.5)=0.6915

P(Z>=0.5)= 1 - 0.6915 = 0.3085

Valor obtenido de las tablas de Z
La Probabilidad de que el monto solicitado sea igual o superior a 80000
Conclusión: el 30.85% de los préstamos solicitados es igual o superior a 80000

b) El monto solicitado oscile entre \$65,000 y \$80,000?

Paso 1 Tipificar

P(65000 <= x <= 80000)	
P((65000-70000)/20000 <= x <= (80000-70000)/20000)	
P(-5000/20000 <= x <= 10000/20000)	

TABLA A: Probabilidades de la normal estándar (cont.)

Paso 2 graficar

z	.00	.01	.02	.03	.04	.05	.06	.07	.08	.09
0.0	.5000	.5040	.5080	.5120	.5160	.5199	.5239	.5279	.5319	.5359
0.1	.5398	.5438	.5478	.5517	.5557	.5596	.5636	.5675	.5714	.5753
0.2	.5793	.5832	.5871	.5910	.5948	.5987	.6026	.6064	.6103	.6141
0.3	.6179	.6217	.6255	.6293	.6331	.6368	.6406	.6443	.6480	.6517
0.4	.6554	.6591	.6628	.6664	.6700	.6736	.6772	.6808	.6844	.6879
0.5	.6915	.6950	.6985	.7019	.7054	.7088	.7123	.7157	.7190	.7224
0.6	.7257	.7291	.7324	.7357	.7389	.7422	.7454	.7486	.7517	.7549
0.7	.7580	.7611	.7642	.7673	.7704	.7734	.7764	.7794	.7823	.7852
0.8	.7881	.7910	.7939	.7967	.7995	.8023	.8051	.8078	.8106	.8133
0.9	.8159	.8186	.8212	.8238	.8264	.8289	.8315	.8340	.8365	.8389
1.0	.8413	.8438	.8461	.8485	.8508	.8531	.8554	.8577	.8599	.8621

Paso 3 calculo de probabilidad

P(0.5)= 0.6915 (tabla acumulada)

P(0-0.25)= 0.4013 (tabla acumulada)

Resta 0.2902

Probabilidad 29.02

Conclusión: el 29.02% de los préstamos oscile entre \$ 65,000 y \$80,000
