IMPORTANCIA DEL INGLES EN AREA DE ENFERMERIA

In the nursing area, English has a fundamental factor because research is currently done in the nursing area and the vast majority of publications are made in that language, it also helps us to learn how to use the instruments used in a hospital It is also very important for the interaction that we may have with our foreign patient or relatives of a patient, English is an indispensable tool for the development of professional activity the benefits are better job opportunities in other countries and above all the benefit of being able to help a patient when required if we handle English well we update ourselves for the benefit of our work
