

Calcula las siguientes presiones arteriales medias

$$110/90 = 110 + 110 + 90 \div 3 = 103.3 \text{ mm/Hg}$$

$$167/100 = 167 + 167 + 100 \div 3 = 131.3 \text{ mm/Hg}$$

$$89/79 = 89 + 89 + 79 \div 3 = 85 \text{ mm/Hg}$$

$$55/46 = 55 + 55 + 46 \div 3 = 52 \text{ mm/Hg}$$

$$68/38 = 68 + 68 + 38 \div 3 = 58 \text{ mm/Hg}$$

$$70/40 = 70 + 70 + 40 \div 3 = 60 \text{ mm/Hg}$$

$$87/30 = 87 + 87 + 30 \div 3 = 68 \text{ mm/Hg}$$

$$110/99 = 110 + 110 + 99 \div 3 = 106 \text{ mm/Hg}$$

$$170/126 = 170 + 170 + 126 \div 3 = 155 \text{ mm/Hg}$$

$$189/124 = 189 + 189 + 124 \div 3 = 163 \text{ mm/Hg}$$
