

# *ALGEBRA*

NOMBRE DEL ALUMNO  
ITZEL ABIGAIL  
NOMBRE DEL PROFESOR  
JORGE ENRIQUE ALBORES AGUILAR  
MATERIA ALGEBRA  
GRUPO  
TECNICO EN ADMINISTRACION DE RECURSOS  
HUMANOS  
GRADO PRIMERO DE BACHILLERATO  
ACTIVIDAD I  
PARCIAL III

Hazel Abigail Tlamani López

# Productos notables

Instrucciones: apoyándose de la antología o del libro baldor realice los siguientes ejercicios de productos notables

$$1^{\circ} (a+2)^3 = \underline{a^3+8}$$

$$(a)(a)(a) = a^3$$

$$(2)(2)(2) = 8$$

$$2^{\circ} (x-1)^3 = \underline{x^3-1}$$

$$(x)(x)(x) = x^3$$

$$(-1)(-1)(-1) = -1$$

$$3^{\circ} (m+3)^3 = \underline{m^3+27}$$

$$(m)(m)(m) = m^3$$

$$(3)(3)(3) = 27$$

$$4^{\circ} (n-4)^3 = \underline{n^3-64}$$

$$(n)(n)(n) = n^3$$

$$(-4)(-4)(-4) = -64$$

$$5^{\circ} (2x+1)^3 = \underline{8x^3+1}$$

$$(2x)(2x)(2x) = 8x^3$$

$$(1)(1)(1) = 1$$

Hazel Abigail Tamani Lopez

# Productos notables

$$6 = (1 - 3y)^3 = 1 - 27y^3$$

$$(1)(1)(1) = 1$$

$$(3y)(3y)(3y) = 27y^3$$

$$7 = (2 + y^2)^3 = 8 + y^6$$

$$(2)(2)(2) = 8$$

$$(y^2)(y^2)(y^2) = y^6$$

$$8 = (1 - 2n)^3 = 1 - 8n^3$$

$$(1)(1)(1) = 1$$

$$(-2n)(-2n)(-2n) = -8n^3$$

$$12 = (1 - a^2)^3 = 1 - a^6$$

$$(1)(1)(1) = 1$$

$$(a^2)(a^2)(a^2) = a^6$$

$$9 = (4n + 3)^3 = 64n^3 + 27$$

$$(4n)(4n)(4n) = 64n^3$$

$$(3)(3)(3) = 27$$

$$10 = (a^2 - 2b)^3 = a^6 - 8b^3$$

$$(a^2)(a^2)(a^2) = a^6$$

$$(-2b)(-2b)(-2b) = -8b^3$$

$$11 = (2x + 3y)^3 = 8x^3 + 27y^3$$

$$(2x)(2x)(2x) = 8x^3$$

$$(3y)(3y)(3y) = 27y^3$$
