

AND ON THE OTHER HAND, I GOT INTO THIS CAREER TO HELP PEOPLE WITH DIABETES, BECAUSE HALF OF MY FAMILY HAVE DIABETES.

I chose this career because when I was little they made fun of me for being chubby, and I decided to lose weight, I put myself on a diet but the problem I have is that I lose and gain weight in between to know what process to take with food

It was also one of the second races that caught my attention, I wanted gastronomy but due to economic problems I chose this career I would like others of this career to study gastronomy

SUPER NOTE

"why did I choose my career?"
