

Reasons why i choose my career of Psychology?

😊 Help myself
Help people
find our identity
so we can try
to be at some point
happy and not frustrated.

I like working with people

am a good listener

I like to help and
try to see other
ways to live better

I am interested knowing more about the mind of the human being and how we have different ways of thinking.

I like to listen people and to be able to give an opinion to my point of view different from theirs if they ask me without criticizing or judging.

I would like to be part of it, to help human beings
mentally and emotionally an to be able to contribute
and learn from them different points of view.
make it easier to make decisions for our own well being.
