# The frog prince.

A nice fantasy story written by the Grimm brothers  
There was once a handsome young prince who had the misfortune to offend a wicked fairy.

One day, the princess threw the ball up so high that when she stretched out her hand to catch it the ball bounced on the stones and fell with a splash into the water.

The Frog Prince or The Frog King is a fairy tale about a beautiful, but pampered and proud princess who is given a golden ball by her father, with which she is fascinated; but one day, playing with the golden ball near a well, the golden ball falls into the water.

Behind rode the prince's servant, who had bewailed the misfortune of his dear master so long and so bitterly that his heart had almost burst. Then all set out full of joy for the prince's kingdom. There they arrived safely and lived happily ever after.

What I found in this story was a lot of simple future was/were and some cases of past continuous
