

UNIVERSIDAD DEL SURESTE

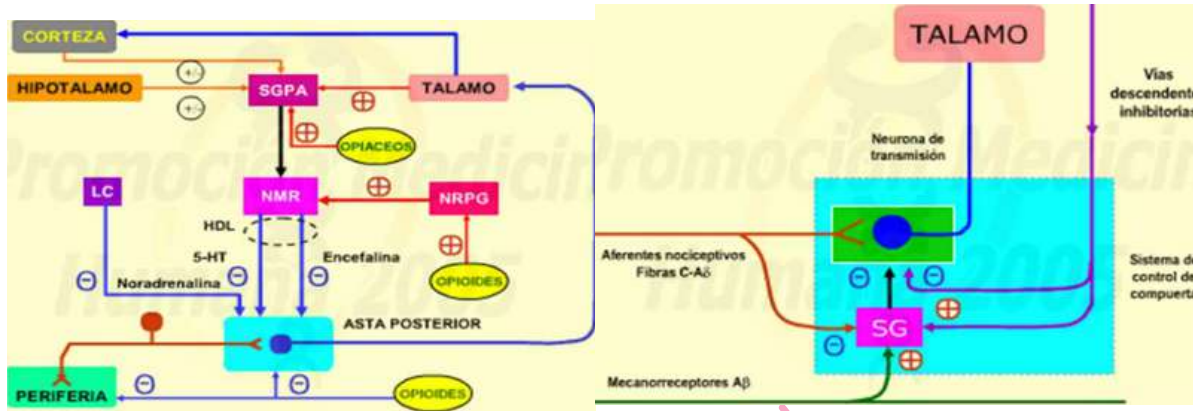

FISIOPATOLOGIA III
SEMESTRE:
4TO SEMESTRE

NOMBRE:
Yajaira Gpe. Méndez Guzmán

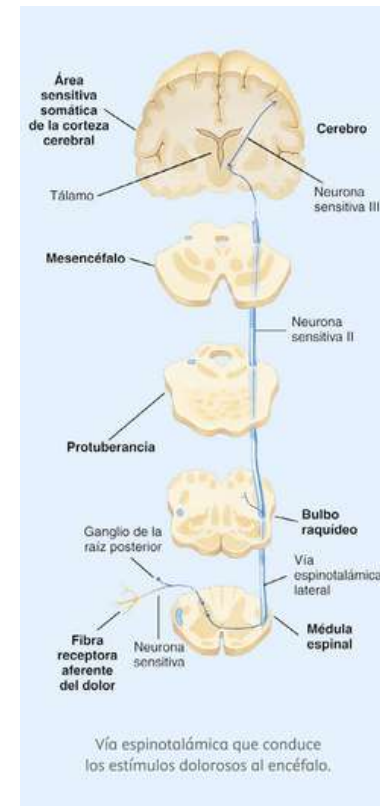

DOCENTE:
DR. SAMUEL ESAU FONSECA

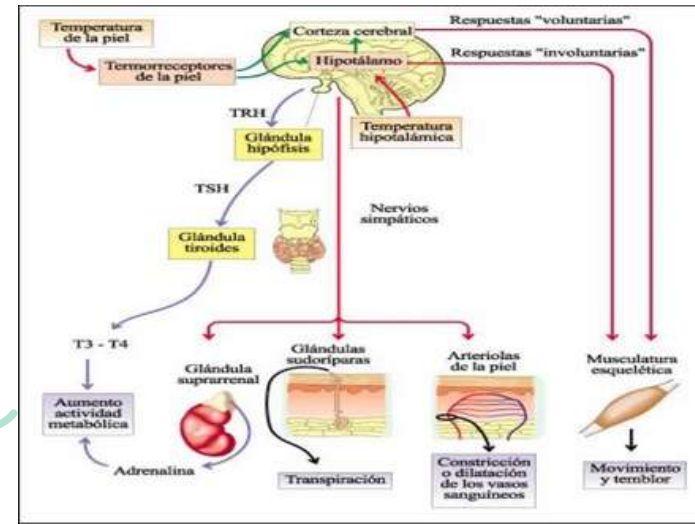

FECHA:
28/04/2023

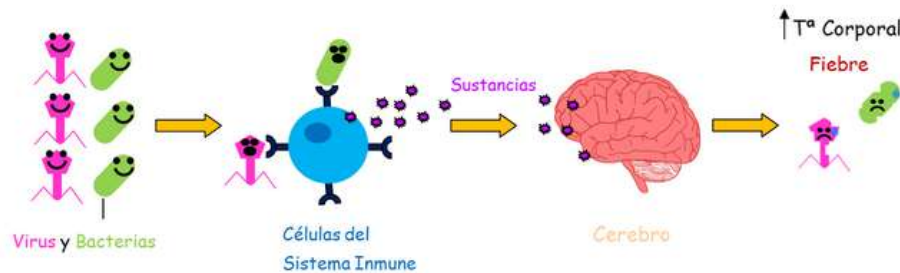

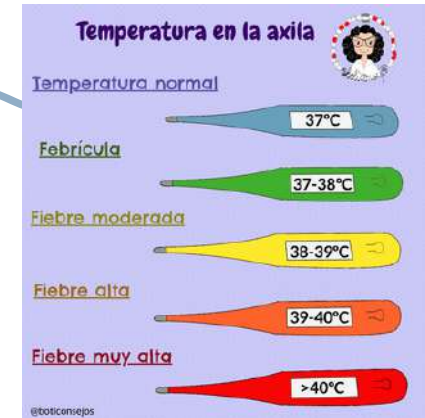

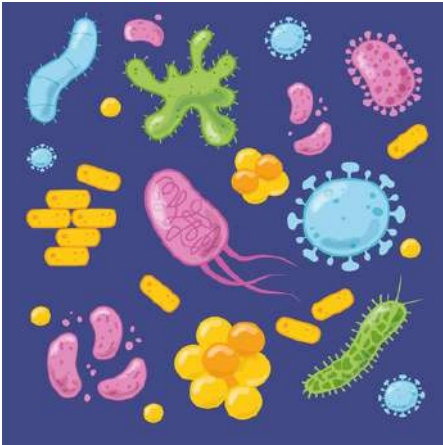

Clasificación del Dolor	
Por su duración:	<ul style="list-style-type: none"> • Agudo • Crónico
Por su patogenia:	<ul style="list-style-type: none"> • Dolor Nociceptivo • Dolor Neuropático • Dolor Psicógeno
Por su localización:	<ul style="list-style-type: none"> • Somático • Visceral
Por su intensidad:	<ul style="list-style-type: none"> • Leve • Moderado • Severo

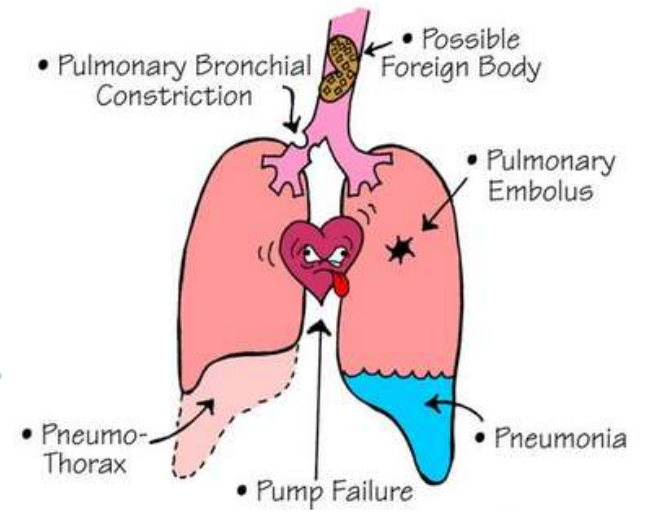

DOLOR

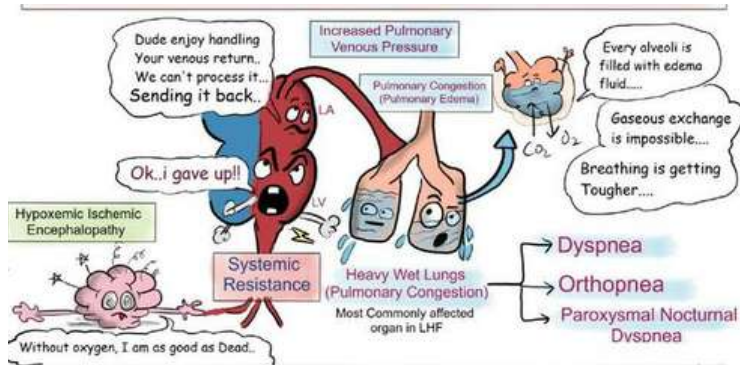

FIEBRE

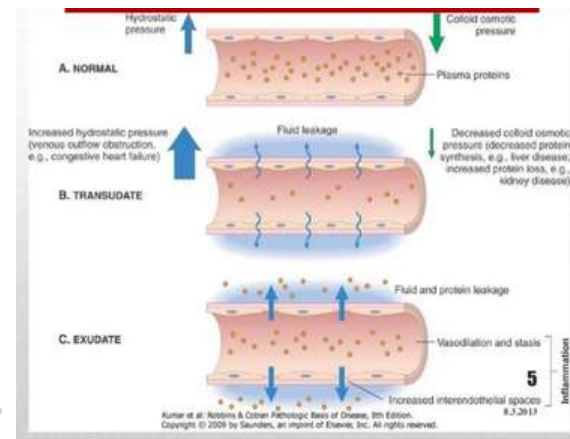

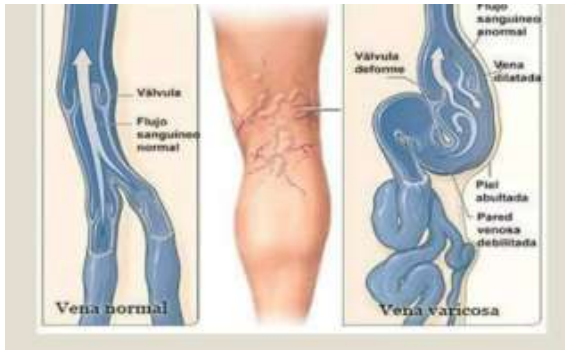

DISNEA

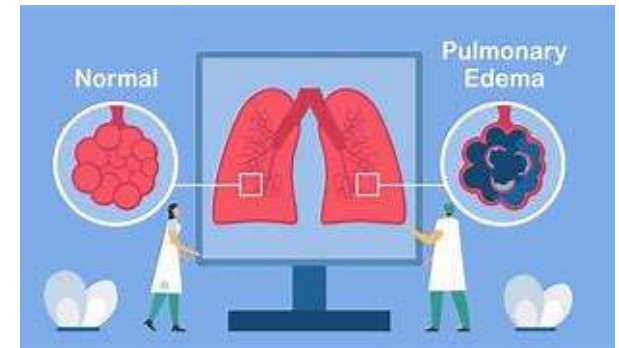

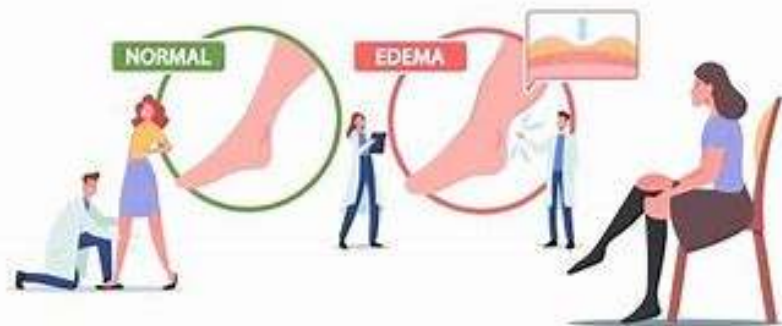

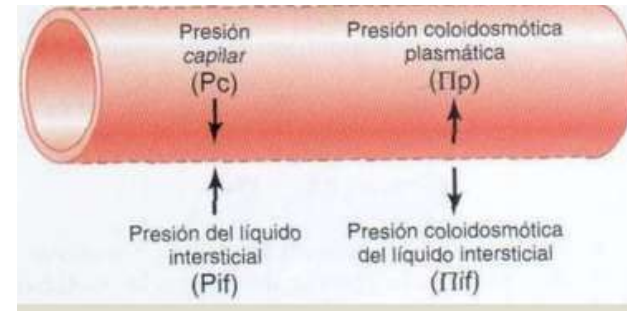

- **Dyspnea**
- **Orthopnea**
- **Paroxysmal Nocturnal Dyspnea**

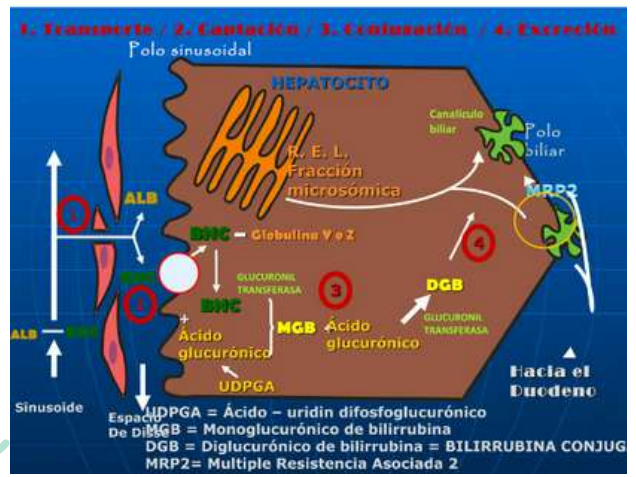

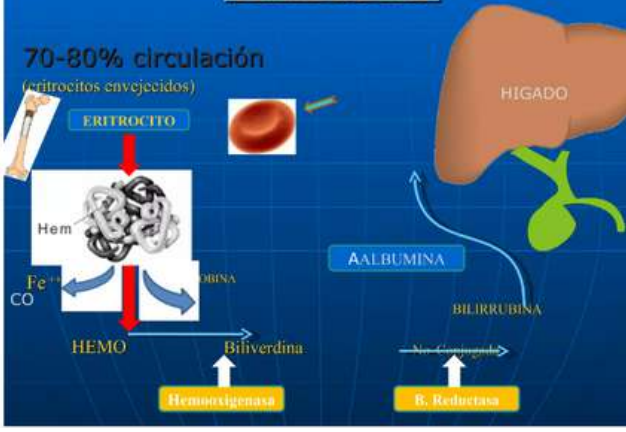

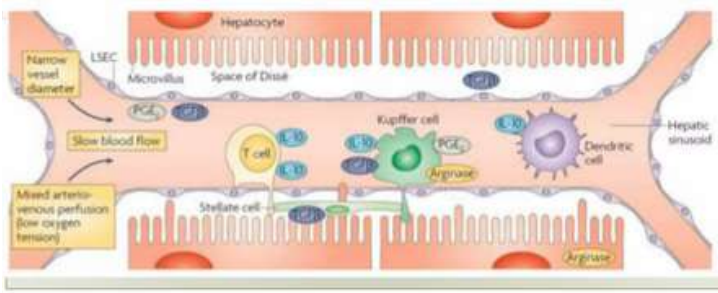

EDEMA

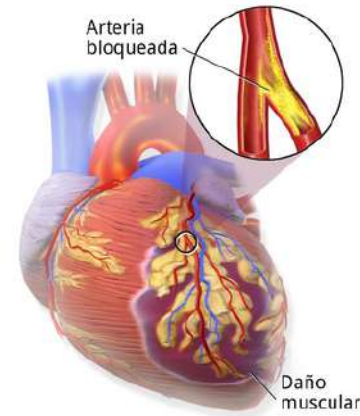

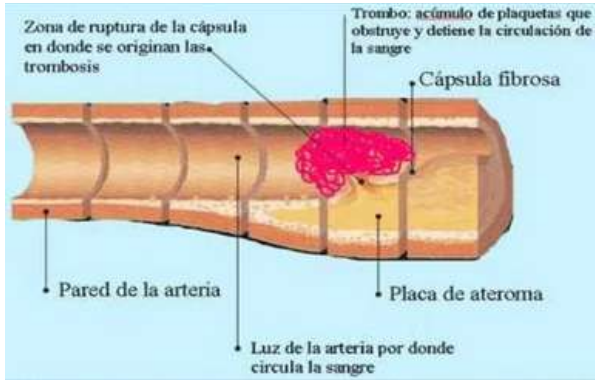

Bilirrubina

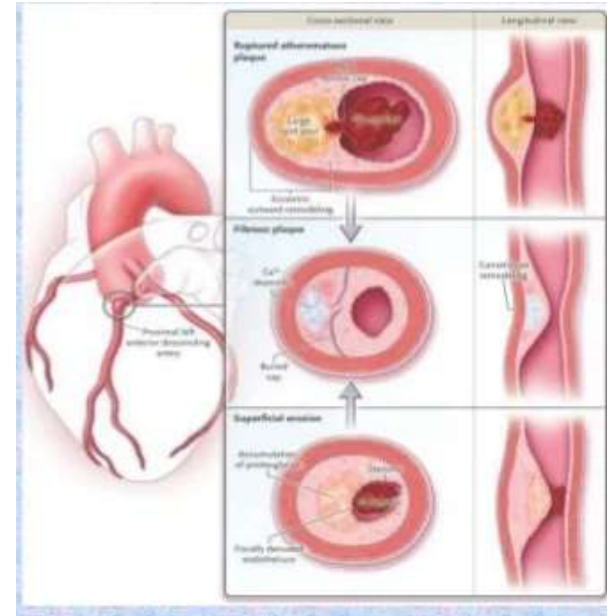

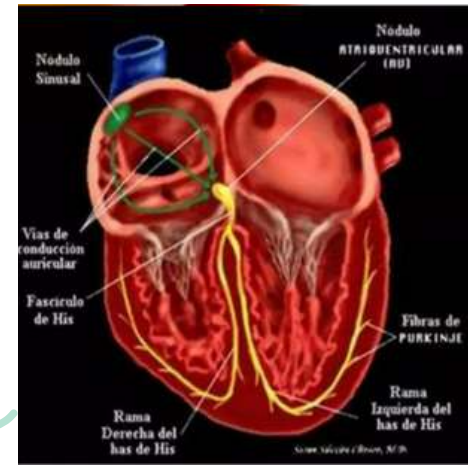

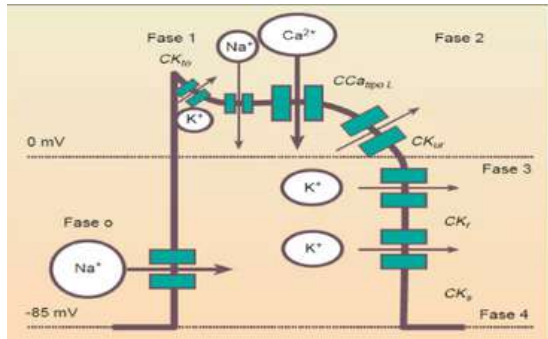

ICTERICIA

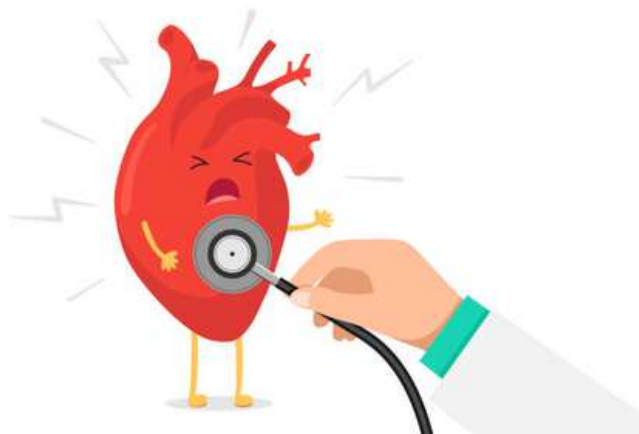

CARDIOPATIA ISQUEMICA

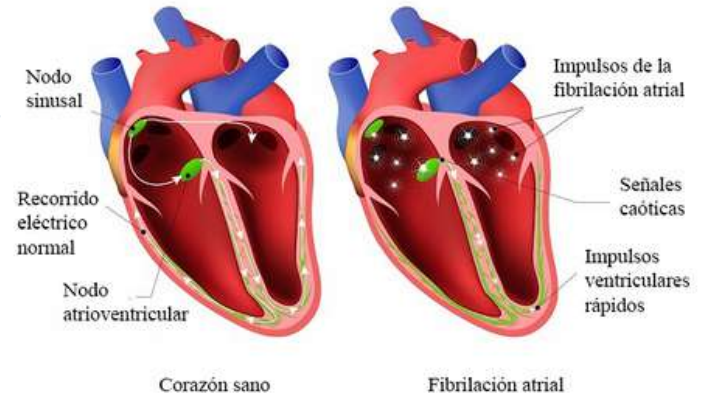

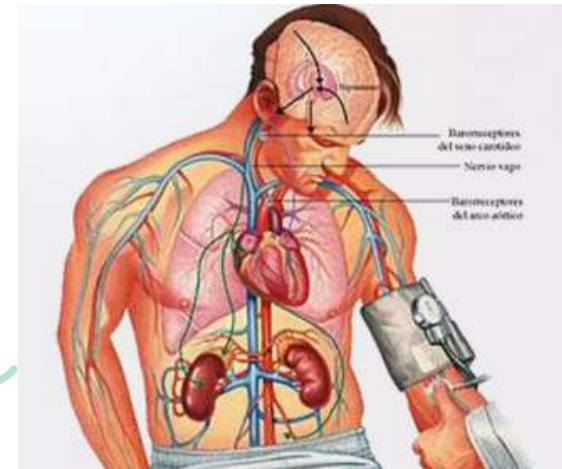

ARRITMIAS

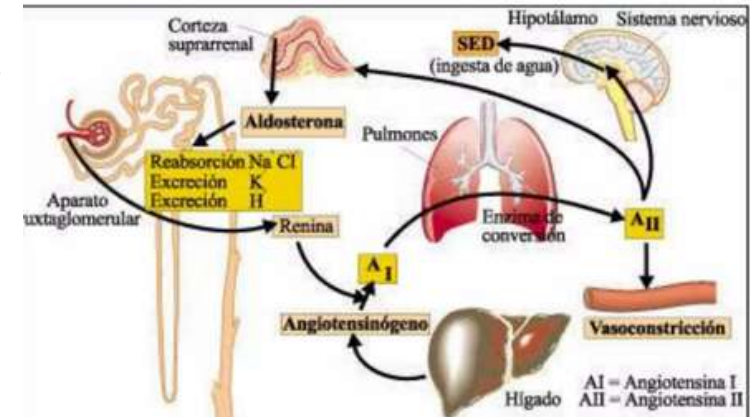

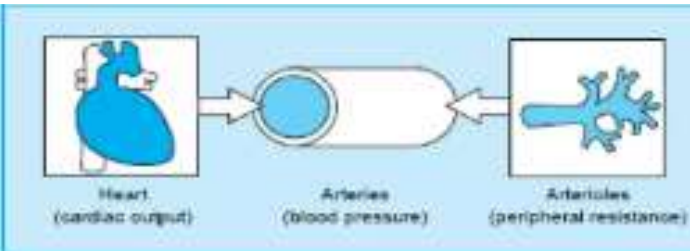

Arritmia cardiaca

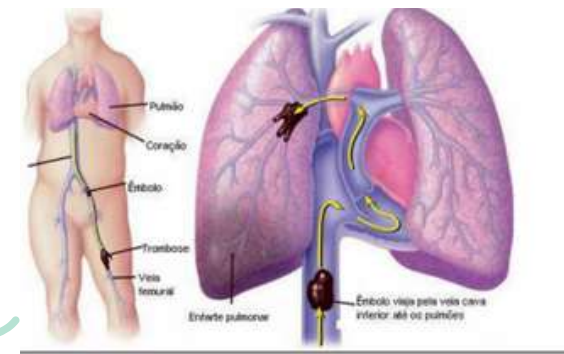

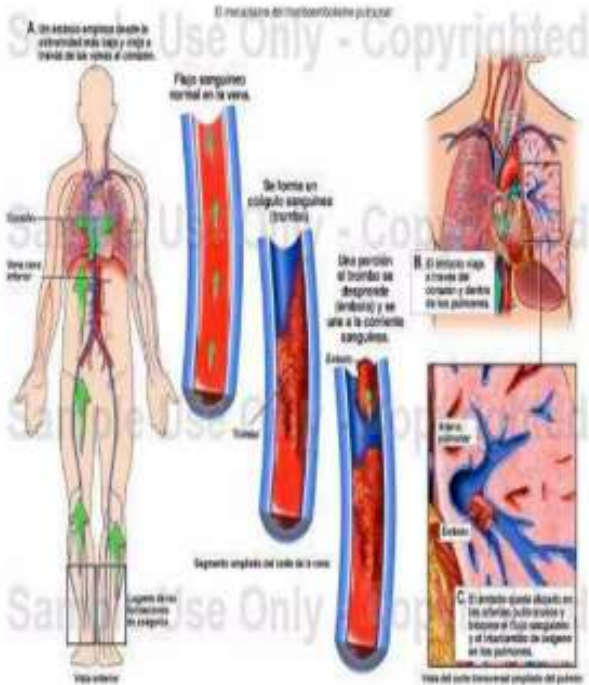

La presión arterial mide la fuerza que se aplica a las paredes arteriales

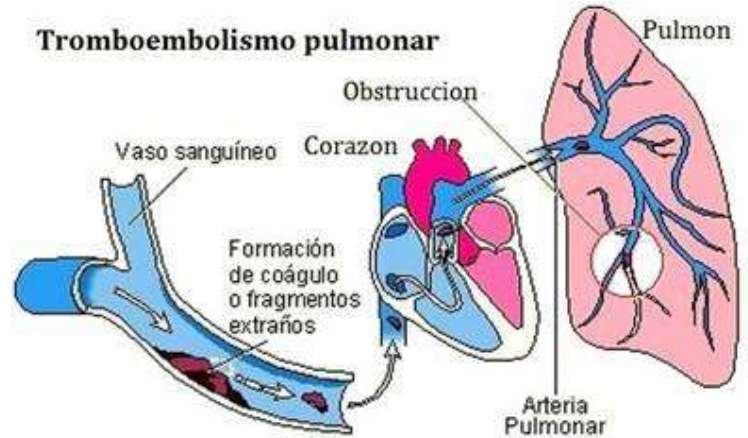

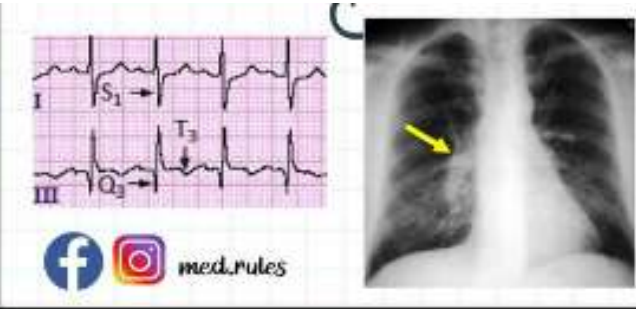

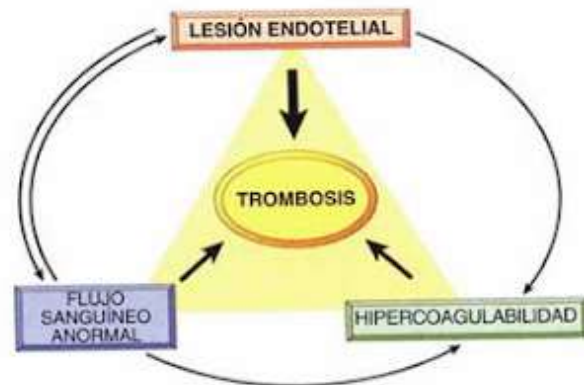

HIPERTENSION

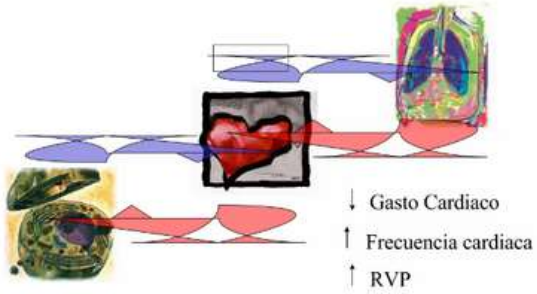

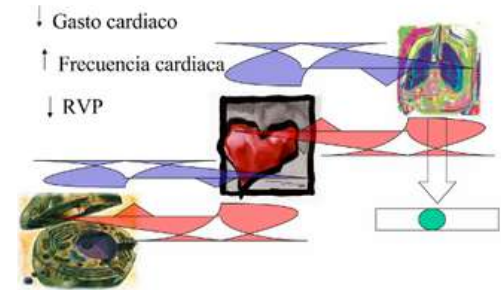

TROMBOEMBOLISMO PULMONAR

Shock cardiogénico

Shock obstructivo

Patogenia del shock anafiláctico

- Liberación de Histamina
- Permeabilidad vascular
 - Contracción del músculo liso
 - Vasodilatación
 - Estimulación corazón
 - Terminaciones nerviosas estimuladas

SHOCK

Shock distrubutivo
