2. What are you going to do when you finish your degree? (100 words)

I think after graduating, my plan is to focus on finding a job in the field of systems engineering. I believe this field has great potential for growth and opportunities, and I am excited to be a part of it. In addition to this, I have decided to focus on learning more languages to expand my working areas and fulfill my dream of traveling to Canada and Korea. I believe that learning new languages will not only help me in my profession but also in my personal life.

Moreover, I have decided to spend more time with my friends and family. I often get too engrossed in my studies, and I feel like I have missed out on spending quality time with the people I love. Therefore, I want to make more of an effort to go out and have fun with them as well.

Overall, I am excited for this new chapter in my life and look forward to all the opportunities and adventures that come my way.
