My name is Carlos. My plans to have a nursing career are to be able to help the patients and to the sick and to the healthy to be able to provide a good medical service and since the promotion I have intervened to help the population and families to have a better lifestyle and to the health of each person and I, as a nurse, would like to give and support the improvement of a state of health. I am also for that reason I want to become a nurse and to support and exert a good performance to the health of the person and therefore, people need health personnel to treat their illness and the nurse will be evaluated while intervening in the person's health and for what they are called for what they know and how to act and to help the improvement of their disease of the person, family, community
