

Frontera Comalapa is a large municipality, it has a church, two parks. A combination of cultures arises, it is a municipality that demands adequate health services due to population growth and it does not have hospitals. Second and third level centers only for primary care Frontera Comlapa has private schools such as the UDS Frontera Comalapa They have a culture house where marimba, dance, guitar drawing and painting classes are taught. In the town there is a super market like Mi Bodea Ahurrera and a Coopel department store.

among other chains of national origin such as, electra, milano and Parisian fabrics You have several fields, and with big Hills, It has large plains and rivers. Although they are already very polluted, over time they dried up and now they are just streams bordering Comalapa. I used to like that very much A few years ago, but now because of the insecurity in the municipality I almost don't like it anymore because you can't leave in peace.
