**subject:** Ingles

## **Description of my municipality**

Frontera Comalapa is a beautiful municipality. It is located in the border area of the state, on the limits of the Sierra Madre de Chiapas. The municipality is beautiful since its relief is diverse and also mountainous.

The vegetation is diverse, most people are dedicated to temporary agriculture (growing corn, beans, peanuts, etc.) those are their main economic activities, including animal husbandry. Its other main economic activities bordering the municipality are retail trade.

The landscapes are what give a magical touch to the nature of the Comalapa border area. It is a municipality that demands health services since the hospital there does not have the medications that one requires or the doctors that the population needs, nor does it have universities since the only public one does not have many careers, only three.

I liked Comalapa but now, due to the insecurity that exists, I don't anymore. The people who live here can no longer go out peacefully for fear that something could happen to us.
