PARCIAL: Tercero.

MATERIA: INGLES I

NOMBRE DEL PROFESOR: Lic. Hernández Ordoñez Mike Anderson.

LICENCIATURA: Enfermería.

CUATRIMESTRE: Primero.

Frontera Comalapa, Chiapas a 13 de noviembre del 2023

My municipality is Frontera Comalapa and I would describe it as a place that has many trees, many hills, some rivers, green areas and some fields. At first living in this place was safe but when the pandemic arrived everything changed, it is no longer a safe place, you can no longer go out because they block the roads and there are certain restrictions, etc. When I entered college I took a few paths. There that made me observe how nature beautifies the streets. And there are more wooded places and more green views than in the center of the municipality, so it looks quite nice. I really like living here, I grew up here and when it rains the weather looks very nice, and although there are still uncemented roads, the smell of wet earth and the dark color they take, as well as the trees and hills, is the part that most I like my municipality, it has a flora which represents it for having places that are quite recognized precisely for their flora.
