make a description of your town.

Cuauhtémoc is a very beautiful and peaceful place, it is surrounded by many streams and rivers among other layers of water, it is generally a swampy jungle place with many common and strange animals as well as plants, the people are warm and seek the family before everything and that makes them very united and happy, on holidays they are very fun and entertaining since they do many activities for both big and small people, most of the time the weather is pleasant for gathering and one of the most common local fruits are mangoes and one of the most strangers is the rose apple and this is my humble place where I live.
