LICENCIATURA: Enfermería

CUATRIMESTRE: Cuarto

PATIENT-NURSE CONVERSATION

Patient. Good morning, nurse. Kenia.

Nurse. Good Morning Yarix, what is the matter whit you?

Patient. I feel very bad, I have a intense headache.

Nurse. Do you have a fever or runny nose?

Patient. I just had a fever.

Nurse. Do you have any other symptoms or is it just that?

Patient. I have had joint pain and nausea.

Nurse. How long have you had these symptoms?

Patient. About a week ago.

Nurse. Well, it could be a possible infection, but to be sure that´s what it is, we´re going to do some blood tests.

Patient. It´s okay nurse, I´m going to do it.

Nurse. For now you should take care of yourself and try not to eat food sold on the street.

Patient. Thank you nurse, I promise to take better care of myself.

Nurse. When you have it, bring them to me so I can analyze it and then give you the appropriate medication.

Patient. Thank you nurse, have a good day.

Nurse. Thank you also, hope it goes well.

Patient. Thank´s.
