Medicine

It is linked to promote wound healing, strengthen the immune system and improve response to medical treatment.

- provide the amount of nutrients
- maintain muscle mass
- appropriate nutrition for the pathology

Chemistry

Contributes to the preservation of food through the main food additives

- Product production improvements
- Food preservation
- Transformations of food nutrients in their use.

Biochemistry

It provides what is necessary to molecularly understand all the digestive and metabolic processes that nutrients undergo.

- Learning metabolic pathways
- Essential to avoid deterioration
- Guarantee the quality of the food industry

Psychology

They are related because how we feel affects how we eat and absorb nutrients

- Mood reflects our diet
- Develop self-control of anxiety with food.

Physiotherapy

It has an impact, because the muscles must receive the necessary nutrients to execute efficient body movement.

- nutritional intervention with energy balances, depending on the chronic disease that the patient presents

Math

They have a certain relationship due to the use of numbers when calculating quantities and portions.

- Diet creation
- Create database and tables
- Calculate food quantities

Marketing

Includes the use of technology in order to improve the quality and healthy and functional criteria of foodstuffs.

- Advertising by not exceeding the consumption of fats, sugars, salts, dyes, etc.
- promote the consumption of fruits and vegetables through the media
