

## Mi Universidad

**Nombre del Alumno:** Brandon Ursain Cárdenas Villatoro.

**Parcial:** Segundo

**Nombre de la Materia:** Ingles I.

**Nombre del profesor:** Mike Anderson Hernández Ordoñez.

**Nombre de la Licenciatura:** Enfermería.

**Cuatrimestre:** Primero.

In the place here where I live it is usually almost always very cold because we are close to many mountains, this means that every time it rains several rivers are born around my town, in these mountains when it is spring there are plants that give fruits that make the animals come closer there, That's why the people who hunt go there at that time, the place where I live is cold so the flora and fauna that there is a lot since they make the land always wet, making there are many large trees and variety of life in it, also here where I live there are several beautiful constructions one of these is a huge church that they are building in the center of my village.

I also like my town here because when it is summer the weather is warm since it is not too cold or too hot, also when it is summer we like to go with friends to some of the rivers that are around to cool off.

And those are some of the things that highlight the place where I live, which is Guadalupe Victoria.
