My town. chicomuselo

My town is small, there are many mountains around, my town is located in the middle of two rivers, one is called Yayaguita and the other Tachinula, one of them runs cold water while the other is warm water, in the center of my town we can find the Catholic Church of Saint Peter and Saint Paul, we have a park that was built many years ago and another that was built a few years ago, in the old park there is a large tree called seiba. My town has many communities In them we find some natural pools, also a waterfall and some ruins. In my town, beans, corn and coffee are grown and it exports livestock, although not much. It is a pretty nice place, although a little boring. I live in a neighborhood where we all know each other and we are like a family and there are many beautiful trees and plants. Each house has a fairly large patio and they have different types of flowers. At the entrance to my town there is an arch and then a bridge, we only have one gas station, our market is now located in the center field and everyone comes to buy and it becomes very happy, my town is a town where we find a lot of nature
