*Parcial :I*

*Nombre de la Materia : inglés*

*Nombre del profesor: Lic. Make Anderson*

*Nombre de la Licenciatura : enfermería*

*Cuatrimestre: I*

My town is small but beautiful because it has a soccer field, its roads are very wide, there are very large and beautiful bridges on one of the bridges there are many small trees which take us to the market, the market is large and sells many fresh vegetables, on the soccer field there are many little trees, plants flowers, for me the most beautiful thing about My Town is the field because it gives me a lot of tranquility and also because people come to play and seeing people go after that ball pleases me a lot, just as the streets are very big, seeing the children playing running, playing hide and seek makes me remember when I was little and played soccer or ringworm or ran without I really like living in this place because I feel that life is more fun if I see it that way without getting tired and lighter because even though the place is very small, I really like the idea that it has a field to play let there be many trees and flowers in the field because that makes it more beautiful. I also really like the trees around it, because the trees around it are very beautiful, when the wind blows the trees move, the flowers spread and it is something very beautiful because it is what transmits us a lot of tranquility and peace.
