Description of my town

My town is very beautiful and silent, it is green and colorful. You can play with friends without any problem in parks and soccer fields, there are young people and almost everyone knows each other.

It is rural and mountainous, some areas are modern. There are many soccer teams and also basketball teams, there are teams of various categories, and there are also basketball teams.

There are schools from elementary to high school. There are many stores to buy all kinds of food, there are also many clothing stores.

The weather is good, it is neither cold nor hot, it almost never rains, but when it rains, it rains a lot.

The holidays are good for going out with friends but the thing is that there aren't many fun attractions. Another thing I don't like is that there isn't a very good atmosphere.

Always some of the things I like the most about here are: that there are very good people, that there are sports places and that the weather is good.

It is undoubtedly a place that expands over time, I have seen new constructions that obviously help the neighborhood look much better and more populated. The people here are very hardworking, humble, and above all very kind. Some merchants have been established here for many years and others are new.

People usually go out for a walk or jog on weekend mornings, since it is very quiet, relaxing and is also somewhat away from pollution.

Although, like many other places, there is a negative point and it is one of the things that many have undoubtedly complained about, such as alcoholism, especially in some parts of the town. Sometimes it becomes a depressing spectacle starring these people who in many cases end up lying on the sidewalks, where people circulate, even more so taking into account that there are many children circulating in the sector.

Although this is something that is not positively rescued in this place, it is expected that in the future this will change, especially for boys and girls.

Flora

Pine, oak, oyamel and testate forests, located in the high parts of the mountains; the jungles are located to the south of the entity; grasslands have a wide distribution

Fauna

In the nearest forests: kangaroo rat, wild cat, gray fox, skunk, coyote, raccoon and scorpion. In bodies of water and wetlands: axolotl, charal and wading rail birds; Invasive species have been detected, among which the gecko, cane toad, carp and rainbow trout stand out. Animals in danger of extinction: volcano rabbit, striped cross rattlesnake and transvolcanic mask
