THE INFIRMARY

AND ITS RELATIONSHIP WITH OTHER SCIENCES

INTRODUCTION

Nursing is a discipline that has enriched over the years thanks to collaboration with others sciences.

THE SCIENCES MOST RELATED TO NURSING IS THE SCIENCES ACCURATE, SOCIAL AND HUMANISTIC.

The exact sciences, such as biology, chemistry and physics, are important for the nursing because they help to understand the biological and chemical processes of the body human, as well as the physical principles that govern health and illness.

SOCIAL SCIENCES, SUCH AS SOCIOLOGY AND PSYCHOLOGY, ARE IMPORTANT FOR NURSING BECAUSE THEY HELP UNDERSTAND HOW SOCIAL AND PSYCHOLOGICAL FACTORS CAN AFFECT THE HEALTH AND WELL-BEING OF PATIENTS

The humanistic sciences, such as Philosophy and ethics are important for nursing because they help to understand the human nature and importance of dignity and respect in attention sanitary.

IT IS IMPORTANT TO EMPHASIZE THAT NURSING DOES NOT YOU ONLY BENEFIT FROM THE COLLABORATION WITH OTHER SCIENCES, BUT ALSO CONTRIBUTES TO THEM. FOR EXAMPLE, NURSING HAS CONTRIBUTED TO THE DEVELOPMENT OF GENETICS, THE PHARMACOLOGY AND EPIDEMIOLOGY
