Venom

Hello everyone my name is Venom, I'm from the film Venom (2018) and Venom: Let there be Carnage (2021), but you can also see me in the movie of Spider-Man 3 (2007) with the actor Tobey Maguire.

I'm from the planet Klyntar where our god, Knull, created us with the purpose of defeat the Celestials. I need of a Host to still alive and show my strenght and power. My origin in the Movie of Tobey Maguire is more different of the comics I came from a meteor which collides with the earth and found the suit of the Spider-man and creating the emotive and Characteristic Spider-man with the symbiot suit, which is black.

In the move of Venom (2018) my form is like a stronger and taller monster which is totally black except from my eyes which are white. I have an aggressive conduct with my surrounds and I want to eat everything what is eatable. I made simbyosis with Eddie Brock, who is my best friend in the world.

In the movie of Tobey Maguire, I don't have a specific conscience, but I change the behavior of Peter Parker, day by day, making him more aggressive and egoist with his decisions.

My famous action in Spider-Man 3 (2007) is the dance of Peter Parker getting of the boutique store, and my famous phrase of Venom (2018) is "We are Venom".
