Nombre de la Materia: inglés

Nombre del profesor: Teresita de Jesús Trejo

Nombre de la Licenciatura: enfermería.

Cuatrimestre: 1ro

Hello, I'm Sully Giron. I'm from Chiapas and I'm 29 years old. I'm living in Chapultenango is a little town in the north of Chiapas and is near a volcano Chichonal.

I live here with my husband Joluen for 5 years and we live here because his job he is a doctor, and he works in a little hospital. We have a little house in the center of the town, and we have a pharmacy and a doctor office... and I work here like a medical assistant although we have a nurse who help us, she is local, and she have 3 years working with us.

The town is very little, here we don't have phone signal but we have a good wi-fi and I have communication with my family only by WhatsApp.

In the beginning it was a little difficult for me because it rains a lot here, almost half of the years and it is also cold and I used to live in a hot place on an island before.

I wanted to be in touch with my mom and for the rain sometime we don't have electricity and we depend of it all the time and just like I said is a little place, there is no shopping center here or cinema or a place to go to dinner or some entertainment, here is nothing but I learned to live with the peace of this place because is so relax and everything is vegetation, the people are very polite and friendly and in some way I feel like if them take care of us because they know that we are here alone.. just us.

The town is beautiful it looks like if we're living in the last century or something like that. There is a big church that is from twentieth century, there are many stories about the church and the town that make the place very mysterious, mystical, or magical and the people from outside are very attracted to it.

In my house ... we are just two... Joluen and me and we have two cats and two dogs. They are like my babies... they are with me all the time... his name is Frodo, and he is 3 years old...he was our first baby and he's very spoiled... and she is Lexy... she is ten years old... she was with my mother in-law but she couldn't take care of her anymore so I brought her with me. And the cats are the spoiled of my husband, he is batman he is 2 years old and Gatita, she is 1 year old.

For now, we don't have kids because we are working for a good life a nice way to live to give everything that he or she needs, and I really want to be a good mom and have my own family and that's why we know that we have to work very hard.

I have decided to study nursing because nurses have great responsibilities but also great rewards and personal fulfilment. They help patients in their lowest and most vulnerable moments and are there to support them throughout the recovery period and I have always felt the need to help others.

So, that's all for me now I really hope to you liked this video is just a little view of me. See you soon.
