- In high school I studied technique number #94
- High school at Gustavo Díaz Ordaz school,but I finished my last year of high school at the Vicente Guerrero shool in Ixtacomitán.

I'm thin, I'm 1.69, I like my height, my hair is medium long black, I like to wear it in a ponytail, I feel more comfortable than wearing it loose. I work in a grocery store throughout the week from 7 in the morning to 8 at night and Sunday, Saturday is my day of rest and it is the day I go to university. I live more at work than at home but I like it even though there comes a time when I don't want anything because it's still boring. I like to listen to band music, mostly it gives me peace of mind, I could say it's my favorite pastime.

My favorite food is marinated chicken with spaghetti, I like Sundays because it is the day my family gets together to eat, it is something nice that we are all living together, and my parents are the happiest for us, it is a blessing to have them.

I like to watch horror movies, I hardly have time to watch movies but everything that is horror attracts my attention. My favorite sport is football. Since I started playing I liked it and it has always caught my attention. I hardly do exercises.

I like to read a motivating and reflective book, but I am one of those people who starts reading and gets sleepy.

I have a dog named Duke, he is an Australian Shepherd breed, he is sweet, my whole family loves him.

I decided to study nursing because I would like the health area to be able to help people. Also know the human body what its function is.

Above all, to provide good service to the patient, you must have a vocation because it is about being able to adequately care for the patient so that they feel that confidence and support. Also because my mother is diabetic and suffers from high blood pressure so that I can take care of her health and it is something that motivates me.

First, God, I managed to finish the race.

The only way to do great work is to love what you do.
