IT'S NICE TO MEET YOU

My name is Valeria Vicente Sasso, I am twenty-nine years old.

I was born on the fourteenth of february, one thousand nine hundred and ninety-four.

I am mexican, I live in Juarez Chiapas.

My parents are María Sasso Juarez and Valentín Vicente flores (deceased).

I have five sisters, one brother and nine nephews.

I studied at xochilt kindergarten, primary school in francisco villa, secondary school in technical thirty-nine and high school in cobach forty-two.

I am a happy person, very sensitive, a little angry and very proud.

I got married when I was eighteen, I had my first child when I was eighteen and my second when I was twenty-one.

My first child is called Hanna and she is eleven years old, my second child is named Brayán and she is eight years old, they are in primary school.

At one time I dedicated myself to selling cakes because I really liked baking and I learned from YouTube videos, but for health reasons I stopped doing it, now I only prepare for my family when I have time.

I love desserts, especially cakes, I like spicy food, polish meat is my favorite.

I like coffee with milk, horror movies are my favorites, as well as dramas.

My favorite color is red and black.

I have a dog named Mia, she is black, she is the joy of my children because she is very playful and mischievous.

I have six Little turtles, two small ones and four medium ones.

At twenty-seven years old I had my first job in a pizzeria, what a nice experience.

I currently work in a house cleaning and taking care of children.

My children are my life, my motivation to get ahead, with them I have learned many things, I consider myself a responsible and loving mother with them.

Being a mother, working, and studying is tiring, but every day I go with all the attitude in the world.

From Monday to Friday I take my children to school at eight the morning and

At one in the afternoon I go to pick them up.

I help them with their schoolwork, models, exhibitions or any other activity.

I decided to study nursing, because I want to take good care of my mother and children.

I want to provide the best care and support to patients, and those who don't too.

I really want to fulfill my dreams, to be a great nurse in some specialty.

Now that I am studying it feels nice to learn new things, I always try to give my best, focus on my studies.

It hasn't been easy, but thank God and my job I'm in the race.

It's just the beginning, but I hope to reach the top.

I hope to learn a lot from each class, with the help of the teachers, who give their best every day.

In the future, with God's help, I hope to be that nurse that always dreamed of.
