Nombre del profesor: Teresita de Jesús Trejo Pérez

Nombre de la Licenciatura: Enfermería

Cuatrimestre: I

NICE TO MEET YOU IT'S

Hello, my name is Maria Jose López Surian and I am proudly from Mexico, I live in Reforma Chiapas and I was born here in Reforma Chaipas, that is, I have lived here all my life.

Currently and you could say my whole life, I live only with my mother and my brothers, my mother's name is Mariana and my brothers are called José María, Felipe and the youngest is Gael.

Well, I will tell you where I studied, I studied kindergarten here a few blocks from where I live, I would be lying if I told you the name, but I don't remember unfortunately, I studied primary school at Emilio Rabasa, that one was very far away for me, secondary school I studied it in the bicentennial of national independence, very cool, that school and the high school I studied it in the cecyte 41 and that was in the colony of Carmen, even more remote, by transportation it took me 15 minutes from my house to the school, but it was one of my favorite stages, because I made very nice friends, I will never forget that stage of my life and well, currently I am studying university here in the university that is in Pichucalco, Chiapas.

Well i'll tell you about my taste, first i'll talk to you about my taste in music, if i don't have especial music likes because i listen to bands, regueton, some or others in church and some that are sadder.

About my food taste, well i don't have likes like whatever, there are some or other exceptions but i like everything they offer me ps the same, my mother taught us not to despise anything but thank god i'm not delicate about anything.

In movies i only like scary or sneaky movies but i get more scary and if that case i don't want to watch those types of films i watch series but not anything, i watch korean love series and series that are about narcos.

And finally i will tell you about my taste in sports, currently i do not practice even one but when i was 15 years old i practiced boli boll because i really liked playing that, but i quit it when i was 17 years old that is, i stopped playing a year ago and now.

I will also tell you about my pets that I have, in total I have 7 pets, which are two dogs, a rabbit and four little birds. One of the dogs is called Prince and Pardo, my bunny is called Max, he is one of my favorites because I have always liked them. bunnies and finally I have the little birds, those don't have names because we only identify them by their plumage color and one of my favorites is one that is yellow with orange red something like that we also had a parrot but well it died, well it is everything I can tell you about my pets.

Lastly, I will tell you why I chose the career. I chose the career, one because it caught my attention a little, because criminology caught my attention more but my mom didn't let me study it, so my one solution was to study nursing since my mom is a nurse and works as a nurse, but my I chose it because my mother wanted me to study nursing and here I am, studying nursing, it is worth emphasizing that in the short time I have been studying there are very interesting things and things that I did not know about and that happen at home, for example Biochemistry class is one of them that is interesting. And well that's all I can tell you, thank you very much for your attention.
