*It's nice to meet you*

Hello, my name is Deysi Miranda Álvarez Mateo, I'm 19 years old, I was born in Ostuacan Chiapas, I live in Xochimilco nuevo.

My father's name is Octavio Álvarez Pablo, my mother's name is María natiidad Mateo Mendoza, I have three sisters and a little brother they are called; Ingrid Álvarez Mateo, Limsi Mayte Álvarez Mateo, Leslie Álvarez Mateo and Octavio Álvarez Mateo.

My 16-year-old sister Ingrid has already got married and has a one-year-old boy. I remember that she suffered when she was going to give birth, she and her baby were going through life and death.

when I was three years old I studied at the Rosaura zapata Cano kindergarten, from there I went to live for Five years in Juárez and studied at the Miguel Alemán Valdez elementary school, I returned again to Xochimilco nuevo and finished my elementary at the veinte de noviembre school, I went to Manuel Gutiérrez Nájera 476 high school and finished the COBACH 203.

When I left high school I went to work at a place called Mezcalapa it's a farm where they process guineos, accompanied by a friend named Lorena. Our plan was to work in that place for only four months, while we had no credential and then go somewhere else outside our home, but things have changed. She got her boyfriend, and from that moment things changed between us, her plans started to do it with him and I stayed even side.

I had to return from where I was, and I came to work in plan de Ayala at a company called regal spring .There I met new people, some very kind and others the opposite.

I have two best friends; I met Lizbeth in high school when they dropped us off in the same classroom and I met Citlali when I was eight years old and I was at my aunt's house.

I like listening to music because I feel that it relaxes me and makes me forget my problems a little, the ones I like the most are from: avicii, imagine Dragons, post Malone, John Newman, among others. The food I like the most is the mole that my mom makes, my favorite series is called "ANNE" but I was sad to hear that the other seasons were canceled and my favorite sport is basketball.

I had a chihuahua dog named Pituta, she went out for a walk every time we took her out but one day she didn't come home, we looked for her and she didn't show up, we had to go out as far as she used to go but we found her dead, it made me so sad to see her like this and I can't get over it. And then I found out that it had been my neighbor who had poisoned her. It gave me so much courage, but nothing could be done anymore.

One of my anecdotes was when my mom was pregnant and she had a craving to eat papaya at three in the morning, we had to go out with my dad at that time to get papaya, but there were no shops open, we had to go to a gentleman's house to have his greengrocer open for us and the good thing is that if we were to attend, already back home we were on our way and some dogs started chasing us and one managed to bite my dad, that early morning it was terrible.

My biggest fear was when my dad got sick and felt like he was going to die, he spent eight months in bed he suffered a lot when he saw how he couldn't sleep because of the pains, he didn't eat every time they took him to the doctor, they passed him serum, they gave him so many medicines that he didn't want to take them anymore he said that it was better to die than to keep doing, the worst thing was that that time his brothers and sisters left him alone, but he recovered thanks to God he is better and that made my family feel happy again. He continued with his bakery job together with my mom and I helped them I liked to make cake or pizza he taught me how to make them.

Once I tried to turn on the oven, but it got too much and burned my eyebrows and hair, I was sad to go outside without eyebrows.

Another of the worst things where it has been terrible, was the time when my dad and my brother had an accident, I remember that time I did not want to go to accompany him to plan de Ayala where they were going to look for a horn and my brother decided to accompany him, it was five o'clock in the afternoon when a man came to my house to say that they had been injured, my mom left the house quickly to go where he had been transferred to a hospital, my brother urgently needed an operation on his leg because the bones of that part had been broken and I also needed blood donors because I had lost too much blood, but in the end if he could get out of that, nothing happened to my dad anymore just scrapes and a few wounds .

I feel that the things that have happened have been, for me to value my family. Because I wasn't used to living with them I was more withdrawn and deep down I feel that it makes me happy to know that things have changed between us as a family.

At first my dream was to study dentistry, but it was not possible due to the economy and I decided to study Nursing because I would like to be able to help others with their health and take care of them as they deserve. although sometimes it scares me to think that I won't make it or that I don't have enough capacity to be able to achieve it, but I hope to give my best in this career that I'm starting.
