CURRENT ILLNESS: Patient, female, 35 years old, brown eye color, with light complexion, long black hair with a height of 1.56 and weighing 70 kilos, with sensitive skin reacting to dryness by presenting redness, with a history of Arterial Hypertension since 2012, pain in the abdomen with a sudden onset, colic character, intensity 10/10, imagining in a hemicenturon form that does not yield to the use of antispasmodics (Buscapina) self-medicated at home, where the pain worsens due to eating fatty foods, and relieves in the lateral decubitus position. I present accompanying symptoms such as vomiting and nausea.

Patient reports that 6 months ago, discomfort began in the abdomen, colic type, of lower intensity (4/10), without irradiation, which lasted a few hours, He was not accompanied by vomiting and nausea. The patient reports having taken antispasmodics (Buscapina) with which he relieved the
