TEACHER: TERESITA TREJO PEREZ

SUBJECT: ENGLISH

ISSUE: IT'S NICE TO MEET YOU.

STUDENT: THAIRE JOANY LOPEZ LOPEZ.

DATE. 25/SEPTEMBER/2023

Hello, my name is Thaire Joany Lopez Lopez. I am twenty-two years old, since my birthday is seven June two thousand and uno. I am of Mexican nationality, born in Pichucalco, Chiapas, although I live in a community called San Luis, belonging to the municipality of Solosuchiapa.

In my family we are six members, my mother, whose name is Fidelia Lopez Velazquez, my father, whose name is Napoleon Lopez Lopez, my brother, whose name is Alexis Yeudiel, my younger brother, whose name is Jarlin, and my little sister, whose name is Celeste. I also have a niece on my older brother's side, her name is Kalany, 1 year old, who is our adoration for being the first niece whom we all love, she is a very pretty girl.

Regarding my studies, I studied at the Luis Gonzaga Urbina preschool located in the community where I live, I studied at the Gregorio Torrez Whotero elementary school located in the same community. In my preschool and primary school days I really enjoyed going to school, since the teachers I had were very friendly and entertaining, and I also liked to share time with my classmates who were from the same community. I studied at a telesecundaria called Luis Donald Colosio Murrieta 664, located in the community of Alvaro Obregon, which is thirty minutes from the community where I live by transportation, Although at the stop where the transport leaves to get to school you have to walk about ten minutes uphill, that was what I disliked about going to school, especially in rainy weather, since it was the way up. Although at the stop where the transport leaves to get to school you have to walk about ten minutes uphill, that was what I disliked about going to school, especially in rainy weather, since it was the way up.

During high school it was a very nice stage for me, since I met new people, made new friends, on that date I participated as a candidate for queen of the town fair, at the same time representing the school, it was an experience that It helped me a lot and at the same time I enjoyed it, since it is something I like to do. In high school I graduated in the area of biological chemistry.

After leaving high school I took a break from my studies, because I started working in a shulo culture house for a year, in which I participated as a candidate for carnival

queen representing said culture house, in the which was a very nice experience and at the same time something extroverted.

My favorite pastime is undoubtedly listening to music, since I enjoy paying attention to the lyrics of the songs, what they try to convey to us. I like different types or genres of music, since personally I listen to music according to the mood I am in, I am into listening to banda, rock, cumbia, ballads in Spanish, cover, corrios, among many others, all a little. So I also really enjoy watching movies, especially horror movies, since they are undoubtedly my favorites, although I also like to watch romantic or Korean series in Spanish. Since it is a moment in which I can distract myself while I eat a snack, whether I am accompanied by someone else or alone, I also really enjoy spending time with myself.

Regarding sports, I have never liked doing any. Since I remember that since I was little, due to the health of my feet, it prevented me from doing any sport, which is why I consider that it is for the same reason that I do not like to do any now. I even remember that in schools I was never able to participate in the escort, although it was something that I personally liked a lot. I remember that one day out of stubbornness I decided to participate in an escort, which had some health consequences, which made me rest for a few days, since then I have not participated in any again.

Something that I really like to do and enjoy, without a doubt, is dancing, I love dancing, especially cumbias and banda, hardly any other music, but I do listen to it.

I also like to go to concerts, since they are places I attend with my friends, but because of work sometimes I can't go, but I take advantage of having a good time when I go.

I really like to have a catch-up with a friend in particular, since we have been getting along very well for a long time. We always have a good time, because we watch movies, we eat sweets, we talk until we fall asleep at dawn without realizing it.

When I decided to continue with my studies, I was not clear about what I wanted to study, since I was previously studying nursing but due to personal reasons I had to leave them.

Some time later I decided to continue with my studies, now with a degree in Law, which, not knowing what to choose, I started to think and obtained that degree, since I saw how my father worked, and I liked it, which I saw as an impulse to study, since I also did not know what other career to choose, since.

Something I really like is everything related to makeup, I like doing makeup and doing makeup on other people. I had thought about dedicating myself to that but since my parents did not agree, I could no longer do it, but it is something that in the future I would like to do or train myself better. For now, as I study and work providing a service as a preschool teacher, the truth is that it is somewhat difficult for me to do both, since it is a lot of work and I hardly have any rest, but out of necessity I have to do it, which I only hope I can do. continue and finish my studies, since the truth is that it is costing me a lot of effort, both financially and personally or emotionally. since stress is something.
