Parcial: I

Nombre de la Materia: Ingles I

Nombre del Alumno: Karol de María Martínez Méndez

Nombre de la Licenciatura: Derecho

Cuatrimestre: I

Pichucalco, Chiapas a 25 de septiembre de 2023.

IT'S NICE TO MEET YOU

Hello, I'm from Mexican, I was born in the municipality of Teapa located in the state of Tabasco, on July 30th, 2005; I currently live in Pichucalco Chiapas, my name is Karol de María Martínez Méndez, my family is made up of only three members. My parents are Mr. José Ángel Martínez Sánchez, he is a wonderful father to me; By the way, they have a taco stand and I have helped them since I was nine years old. Mi mother is Mrs. Norma Alicia Méndez Hernández, she is also an excellent and wonderful mother she is always so loving to me. I love my parents so much.

When I turned three years old I had to enter kindergarten called "Amalia del Castillo Ladón" I really liked being in kindergarten since there were many children I could play with and I also loved festivals, In that kindergarten there was a teacher who was very tender with us and taught us a lot even though we were very small, our graduation was very beautiful, I loved my dress and I can't say the same about the dance because my partner was a child who was afraid of being in public but later he became a great friend in high school. When I was six years old, I entered primary school, I studied it in "Colegio Pichucalco" in which they taught us a lot, there were many nuns who were very tender with us but they also demanded a lot from us so that we learned, since this is a Catholic School, when December arrived, they had a competition which was in honor of the Virgin, The entire school participated in this, it was based on making two teams, one team was white and the other blue, these were separated by room, they gave us weeks to accumulate points as a team, when the day of the competition arrived, they played many physical games such as running, jumping, throwing, among others and the teams that accumulated the most points took the honor of having won, like every school they performed dances when special dates arrived, which were very beautiful; when I reached 5th grade they had to form a new escort and I was excited at the idea of being able to be part of it since every Monday I liked to see everything they did and yes, I was able to be part of it; despite everything the school did, I did not feel very comfortable with my classmates because sometimes they were very shocking. When I was 9 years old, my

grandmother gave me a gift, when I got home she gave it to me and I saw that it was a dog that we called Max, although my dad was not very happy with the idea that we had a pet at home, however now he also wants it; Max is very protective of us, especially me but I can't play with him as much since when he entered high school, which he studied in "GENERAL CARLOS A. VIDAL" they detected a problem in my spine which makes it difficult for to play with my dog since he is big and has a lot of strength and that makes me sick. I also stopped being able to go out for a run, which I really liked since it distracted me and it made me feel good, riding a bicycle was one of the physical activities that I liked the most but I had to stop or even exercise, among many others. Until then I thought that the problem I had could be solved since I wanted to enter the Heroic Military College, until the day they told me that they could not solve it and I became very depressed at that time since I was not going to be able to continue doing things what I did and even now it makes me feel bad not being able to do the things that I could do before. The first day of secondary school I was excited to know what new subjects I would see and the truth is that many subjects were not difficult for me since I had studied them in primary school so I did fantastic in first grade also in this grade they had to form a new escort and as they knew that I had been part of it in primary school they asked me if I wanted to be part of the escort again, giving me the rank of standard bearer I was very happy and accepted, one day they told us that they had invited us to a contest, that made us very excited and we started to rehearse more, the day of the contest arrived and of course, we won first place; when our teacher heard the result, he congratulated us and they gave us points for the grade as a reward. We also participated in the parades that the municipality held and they congratulated us as the best escort. Also in that degree I wanted to be part of the technical student council and of course they elected me as their president, but I didn't know what I was getting into because I was in charge of organizing and directing the holiday events and that made me miss classes, we hold many events but I think the one I liked the most was being able to help organize the decoration for the day of the dead, although I got stressed, even for that event I was at a dance that was about the day of the dead. One day they

came to promote a computer course and it caught my attention and I asked my dad if I could sign up and he without a doubt said yes and I spent 2 years studying, the pandemic arrived and they suspended the course, I couldn't even finish the third grade of high school well, I couldn't have a quinceanera party which I had always wanted to have. When the pandemic ended, the course classes resumed and I was able to finish it, so I have a computer science diploma, I was also able to go to preparatory school for the first time which I studied in the "14 de Septiembre", in it I was also part of the escort having to leave due to spinal pain; when I reached the fifth semester I decided to enter the area of mathematical physics with my friend since we would study engineering, but in my case my parents told me that it would not be highly recommended to study it and they are right so I chose to study law and this has been my best option since it is a very interesting career, and I say this because I have a relative who is a lawyer and I have helped him, so I liked it. I dream of being a great lawyer since as I study, I have realized that I like laws and justice, apart from that, it is a pleasant and rough environment.

I have always liked to go for a walk to San Cristóbal, Palenque and Tuxtla Gutiérrez Chiapas, I have also been able to see part of Quintana Roo and Veracruz. I really like listening to relaxing music that you can sing along to. I like to watch science fiction, action and comedy movies and series, horror ones are not my favorites, but I have seen a few, my favorite series has been Blindspot, I also like MARVEL movies.

My favorite food is tacos, however, I also like homemade foods like mole, enchiladas and chilaquiles, for fried foods I like potatoes, hamburgers and wings, I almost don't like desserts since they are very sweet, I would prefer salty things. My favorite drink is orangeade and lemonade, I love strawberry and melon smoothies, I like frappes, I like Coca-Cola and flavored soft drinks. And by the way I don't have any vices.
