Nombre del profesor: Teresita De Jesús Trejo Pérez

Nombre de la Licenciatura: enfermería.

Cuatrimestre: 1°.

Lugar y Fecha de elaboración: Teapa, Tabasco; a 24 de septiembre del 2023.

IT'S NICE TO MEET YOU

My name is Angie celeste Aguirre Cruz, I am 18 years old, my nationality is Mexican, I currently live in Teapa with my mother and her partner, I was born in Villahermosa, Tabasco, I have two half-siblings on my father's side, but I consider myself an only child because part of my mother, I attended kindergarten at the Constance Fernández kindergarten, which left me with many beautiful memories, I attended primary school at Marcos e Becerra, in the same way I really liked that stage where I appeared in many dances and so on I managed to get diplomas, Secondary school because I studied it for a year at the Noe Flor Casanova "federal" school, it was a year that I didn't like very much because the teachers weren't even very lazy in teaching, my classmates were good and we managed to get along in the best way, but they managed to change me in the 2nd year to the front of the room graduate, where I met very nice friends and it was a very special stage for me since it was too relaxed, I remember that they managed to suspend me, then there was an occasion where a classmate had a birthday and some We cooperated to buy him his cake and everything was fine and so on, but I got into a fight with a classmate and he covered me all over with cake. Finally, I managed to attend high school at the Tabasco high school, campus 09, because as we all know it took almost 1 year and half that I managed to have it online and it was like I couldn't enjoy that stage as much, but I still managed to meet some very nice friends, we managed to do too many things during the 4th to 6th semester of high school, which I will take with me forever, in my training it was one of the best, because they taught me French about hotels and so on, which I will not forget, among my musical tastes because the truth is I like to listen to songs in English even if I don't know how to master it, but I really like how it is heard and so on, one One of my favorite singers is The Weeknd, as is Lana Del Rey, one of my favorite foods is pozole and pollo enraja, I like to eat that too much, because I like to go out and have fun with my uncles, why do I spend the time locked up in my house, I like to take care of my nephews, the truth is I have a great time with them, I also like to spend time with my best friend and her baby, I came to visit her, so as not to be

locked up in my room all the time, I hardly go out to parties, I start doing things in my house like washing, cleaning and so on, I would like to live more with my dad, but since he no longer lives with me everything It's been different, I like to talk to my mom about the things I do at school or with my friends, how I'm doing in love and who I like, and like that, I also spent a lot of time with my cousin before she left, We always went for a walk or made videos and so on.

In movies I can hardly see why they bore me, but from time to time I can see but they are more like supernatural like series or that are funny, because the truth is I don't like reading or well I haven't found anything that catches my attention and I spent hours reading, at the moment I don't practice any sport, but before in high school I liked to play volleyball or basketball, I have a little dog who is too playful, I like that about him why we spend our time playing and like that, it's my only company that I manage to have, since I always manage to spend it alone and with him I manage to entertain myself.

Well, as far as why I chose this career was because I took it as a second option, in reality my dream was to study medicine, but economically because it is more expensive and so on, but in the same way I had as a motivation for my grandmother the who has already passed away, it motivated me that I would like to see her helped and cared for, when she was in a bed and I would like to do that for other people, take care of them and be aware of them, be able to see what they can get out of that bed, although There will be times that it is not possible, but at least be an assistant for them, but in the same way I do not want to remain a general nurse, but rather specialize in pediatrics because I love children and I like to take care of them, attend to them and so on, it is a very nice specialty and I would like to achieve that dream or also, if I can, later on, to be able to study medicine.
