Nombre de la Materia: Ingles I

Nombre del profesor: Teresita De Jesus Trejo Pérez

Nombre de la Licenciatura: Enfermería.

Cuatrimestre: 1°

Parcial: 1°

IT'S NICE TO MEET YOU

My name is Juan Manuel Jimenez Alvarez, I am of Mexican nationality, I am 17 years old, I was born in Teapa, Tabasco on October 29, 2005, at this moment I live in Pichucalco, Chiapas.

My mother's name is Eulogia Alvarez Cordero She is 38 years old, she is from Pichucalco, Chiapas, but currently lives in Reynosa, Tamaulipas. My dad's name is Manuel Jimenez Hernandez is 41 years old, currently lives in Ciudad Juarez, Chihuahua by the passage of the United States.

I also have a sister named Analsela Jimenez Alvarez is 21 years old, she lives with me in Pichucalco, Chiapas she studies the accounting degree at the Universidad Autónoma de Chiapas.

She wanted to study a different career, but due to life situations she could not and that was her only choice.

I studied in kindergarten Jorge Camacho Vidal I still remember many things from kindergarten I remember that I had many friends and that I had a lot of fun in kindergarten many things happened to me for example I had an accident and hit my head I was in so much pain that the teacher, he was scared because he made me a small wound and bled they had to take me to the hospital to sew it and so you can heal quickly, I misbehaved and sometimes even hit the teachers, I graduated and went to study at Juan Ramos Taracena Elementary I went through many things fights, conflicts. I remember that I went through many problems even once I almost sent a classmate to the hospital for playing very heavy with him, I still behaved in the best way I was very applied in all school activities and delivered my homework because my parents were always there to help me.

I graduated from elementary school and entered to study at the secondary school Telesecundaria Ignacio Allende de Pichucalco, Chiapas, I went through many things I had a great time with my classmates and I even had a best friend named Ulrik I went through many things at that time, my parents were family problems And they decided to separate at that time, I did a little badly at school as it affected me a bit.

Some time later and to attend third grade I had a problem in school and I was definitively expelled I went to study at the federal high school Juan Sabines Gutiérrez I feel that having changed was something good since since when I wanted to enter to study there. One of the worst things I remember happening to me when I was in high school was that one of my classmates hit me and injured my knee, which left me disabled for a month and I could not attend school, this affected me in such a way because at that age I began to like football and because of my partner I played soccer for a long time and this It made me feel too sad.

At the end of the third year of high school the pandemic was a very drastic change for everyone since we started taking online classes We went through a lot and we did not have graduation we could not even say goodbye to our classmates, I managed to finish high school and I graduated.

Between high school and my parents got into the Colegio de Bachilleres de Chiapas 231 Pichucalco I feel that stage of my life was something very important since I went through many things both good and bad I met many friends and I even met my best friend ulrik, I had a great time I remember that in the first partials I was very low in the grades then some time later I want to The school and I started to get very good grades I had problems and they were also about to expel me the worst of all that were not my problems but other people but they involved me, I met many teachers with whom I got along very well, I also met some friends with whom I got along very well and we lived every day.

I also remember that my classroom considered him as one of the bad guys, since there were several classmates who behaved very badly.

In that classroom where I was alone I could make friends with three people and with them I got along very well, they are called Frida, Eder and my partner ulrik who I have known since high school, I managed to finish high school and graduated with good grades.

My favorite pastime is playing soccer, although I'm not that good at playing it's something that really amuses me because of the coexistence with friends, I also like

to run, I like to play volleyball and I like to go to the gym. My favorite food is mole but I also really like to eat pizza and cakes, I really like coffee, I like to go to the beach, I also like dogs I have a dachshund named Peque and a Husky puppy named Bethoven both are very playful and I like to take them for a walk. I really like band songs and also artists like The Weeknd, Drake and the famous corridos tumbados.

When my parents come to visit me I like to spend time with them and my family, since as they live in other places I can not see the followed ones so I take advantage of the time they come to visit me to have fun and live with them.

I am currently studying at the Universidad del Sureste, the undergraduate career in nursing, I decided to choose this career because I like what is related to the health sector, I would like to learn a lot about this career in order to apply all my knowledge when a person needs my help, also to take responsibility for myself and be able to have something stable when I am older.

In conclusion, becoming an autobiography made me realize that everything I have lived throughout my life in one way or another has marked me, also that the memories I have most are happy and although I also have sad those are the ones that have made me stronger.
