Parcial: I

Nombre de la Materia: INGLES

Nombre del profesor: TERESITA DE JESUS TREJO PEREZ

Nombre de la Licenciatura: ENFERMERIA

Cuatrimestre: I

It's nice to meet you

My name is Katia Nicole es Silva Castro I am seventeen years old and I live in Pichucalco Chiapas; I was born in Villahermosa Tabasco and my mom's name is Eunice Castro and my dad's name is Jorge Silva. I have a brother on my dad's side and a newborn brother on my mom's side. My parents separated since I was about 6 years old, I have been with my mom all my life, but a few months ago I lived with my dad and then I went back to her because she was pregnant.

I hardly remember my childhood, and what I do remember are bad moments; I studied at the Leona Vicario kindergarten and I didn't have a graduation picture because my mom forgot to go that day; I started elementary school at Juan Ramos and finished it at the Niños Heroes school, because at that time there was a lot of strike and also because I suffered bullying; At school I continued with my high school, in the classroom where I was there were classmates who had studied with me in kindergarten and some in elementary school; I finished my high school in times of pandemic but even so I had my graduation picture. When the pandemic hit, it was very bad because you could no longer see the people you saw every day or talk to them in person because you had to be in quarantine.

My grandmother wanted me to finish high school there because they guided me in the things of God, since the school where I was was Adventist and had certain rules, but I continued at COBACH dostreintayuno with all my friends from high school; I made new friends and friends who made me realize that they are not friends. Then after that I went to Tuxtla to finish the semester there because of some propaedeutics for the university exam; the truth was something very difficult because it was already the last semester and I was a new person and I was not with my friends, I was with unknown people, it was a big campus, there I began to

like basketball more, in fact, it is one of my favorite sports along with volleyball, but I do not play them in a row.

My GPA in high school was 9.4. I regret that I didn't put a lot of effort into it in the last semester, but that's something. In Tuxtla I made a best friend that I appreciate very much because he was there when those I considered friends there turned their backs on me and he is a very cool person, I really appreciate him a lot, too bad I won't see him again. During that time I was there I missed my dog a lot, her name is Nina, she is a french pool and she is about a year and four months old; we bought her when she was a month and a half old and we thought she was a boy that's why we were going to buy her, but she turned out to be a girl. She is the pet that has lasted the longest since the others have died or have been given away. I had rabbits and a dog killed them. I really like Adam Sandler movies and movies that have to do with comedy and horror; love movies and sad movies make me sentimental and sometimes I cry so I avoid watching those kinds of movies. I don't read any books, but I had a book called Nicky's diary, I was going to buy the whole collection, but I couldn't and I kept that one I listen to music, mostly reggaeton and I like the other genres, but I listen more to that one. My favorite food has been empanizado, beans with rice, steaks, empanadas. My least favorite food is liver with onions.

In my free time I help my mom or I watch the phone, do my pending activities and go to work in a cafeteria. It was a very difficult process and stage for me when I found out that I did not pass the admission exam and it still is because all my classmates left and I am still here, but it is what it is and I am also studying it so that they do not take away my pension, because I have problems with my father, in fact, for the same reason I do not want to turn eighteen.
