The patient's name Carlos Antonio Hernandez Cuello, he admitted because he felt, he was admitted with appendicitis pain. He is forty years old, was born on March twenty-third, 1990. His eyes are blue, his skin is brown and his hair is brown.

The diagnosis that was carried out has a temperature of thirty-seven degrees, it measures 1.70, it was a weight of seventy-seven kilos. Due to his state of health, this patient has a very good mood.

Carlos felt a lot of pain in the twenty-four he was in the hospital. The doctors have given their diagnosis, apparently everything is in order with the case of Carlos.

Carlos despite his age, likes sports, and his favorite sport is soccer, and he's on a soccer team.

Carlos has two children a girl and a boy, his daughter is called Pamela and his son is Damian. His wife's name is Alonsa, he has a beautiful family, he loves spending time with them and Carlos wants to recover his health. Carlos is a computer systems engineer and loves his career and the work he does.

Carlos is recovering his health every day, the pain from appendicitis is not chronic, the doctor told him that he will undergo treatment so that his health can improve. And soon you will be able to go home without any problem. His family Carlos, is eagerly waiting for him. Carlos feels happy because he has already left the hospital and his health is much better. The pain left him discharged and he feels very happy because he will be able to go home and be able to work again. And so you can also start working again. His family gave Carlos a welcome meeting for being home again.
